EXPERIENCE

Java Developer | Zest India IT Services, Pune

March 2026 – Present

- Developing scalable microservices and REST APIs using Java, Spring Boot, Hibernate, and JPA.
- Working with Apache Kafka for asynchronous event-driven communication across distributed services.
- Designing and integrating backend APIs for enterprise-level business workflows and data processing.
- Containerizing backend applications using Docker across development and staging environments.
- Debugging API payload mismatches, SQL query issues, and inter-service communication failures.
- Participating in Agile sprint planning, code reviews, and Git-based collaboration workflows.

Software Developer Intern | Infosys Springboard, Remote

Oct 2025 – Dec 2025

- Built and enhanced RESTful APIs for a MERN-based application (Hire A Helper).
- Standardized API contracts for consistent request/response structures and validation handling.
- Integrated backend APIs with centralized exception-handling mechanisms.
- Collaborated in Agile sprint cycles through pull requests, bug fixes, and merge conflict resolution.

Java Developer Intern | Bentork Industries LLP, Pune

July 2025 – Sept 2025

- Developed backend modules including Users, Sessions, and Payments using Spring Boot.
- Implemented session lifecycle management with wallet validation and session state handling.
- Worked with REST APIs, layered architecture, and MySQL database integration.
- Debugged API payload mismatches, SQL errors, and timeout-related backend failures using Postman and structured logging.
- Managed feature development and issue fixes using Git branches and pull requests.

PROJECTS

Share2Go – Ride-Sharing Web App | Tech Stack: Spring Boot, React.js, MySQL, Docker

GitHub: https://github.com/Laxmankale/share2ride_Ride_Sharing_App

- Designed and implemented 15+ REST APIs for ride booking, search filtering, and user management.
- Implemented JWT-based authentication and role-based authorization for Drivers and Passengers.
- Applied DTO pattern with layered architecture (Controller → Service → Repository).
- Designed relational MySQL schema for users, rides, and bookings.
- Integrated React frontend with backend APIs for real-time ride booking workflows.

Sweet Shop Management System – Inventory & Sales Platform | Tech Stack: Spring Boot, React.js, MySQL

GitHub: <https://github.com/Laxmankale/sweet-shop-management-system>

- Built a full-stack inventory and sales management platform using Spring Boot and React.js.
- Developed REST APIs for product management, stock tracking, and purchase workflows.
- Wrote unit tests using JUnit and Mockito for service and controller layer components.
- Tested APIs using Postman to validate request/response payloads and HTTP status codes.
- Integrated frontend and backend services for dynamic product search and purchase workflows.

EDUCATION

Master of Computer Applications (MCA) | SPPU, Pune

July 2023 – June 2025

Bachelor of Science in Computer Science (BCS) | BAMU, Chhatrapati Sambhajnagar

June 2019 – May 2022

SKILLS

- **Languages:** Java, JavaScript, SQL
- **Backend Development:** Spring Boot, Spring MVC, Spring Core, JDBC, Hibernate, JPA, RESTful APIs, GraphQL API Microservices
- **Frontend Development:** React.js, HTML, CSS, Tailwind CSS
- **Messaging & Architecture:** Apache Kafka, Event-Driven Communication, DTO Pattern, Layered Architecture
- **Database:** PostgreSQL, MySQL, Database Design, JPA Relationships, SQL Queries
- **Dev Tools & Platforms:** AWS Basics, Docker, Containerization, Deployment Fundamentals, Git, GitHub, Maven, Postman
- **Core Concepts:** OOPs, Collections, Exception Handling, Multithreading Basics, Debugging
- **Development Practices:** Agile/Scrum, Code Reviews, Pull Requests, API Integration
